FNAME LNAME

City and State | number
example@email.com | www.linkedin/in/username

This is where you write a brief summary of your professional experience. please ensure that it is directly related to the job you are applying for. (3 to 5 sentences max)

SKILLS

- If you are reading this, you are probably applying for a DevOps, Linux admin, Cloud Engineer or Site Reliability Engineering position
- For these types of Jobs, it's important to highlight your technical skills. In other words what tools are you proficient with? Examples: Kubernetes, GitHub, Ansible, etc

Example: Kubernetes, GitHub, Ansible, Terraform, Jenkins, AWS services.
You could also highlight your soft skills such as Communications, Analytical/Problem-Solving Skills: (but I usually advice that you portray that during the interview instead. It will save you some space on your resume).

EXPERIENCE

JOB TITLE   START DATE – PRESENT
COMPANY NAME, LOCATION

- In this section, write the about your employment history, specifically what relate directly to the position you are applying for.
- Start with the most current job and in a descending order
- Use each of the bullet point to describe your job responsibilities
- You can also mention specific project that you did at this position
- Include any leadership role you might have played while at this job
- As a rule of thumbs, I always try to have at least 3 jobs on my resume.
- It is ok to have jobs no related to the field you are currently applying for, but they should not overpower the actual experiences in the said field. So, I would say to stick to just 1 "non-related job"

JOB TITLE   START DATE – END DATE
COMPANY NAME, LOCATION
